SUMMARY

Aspiring Full-Stack Developer with a foundation in software engineering and advanced studies in full-stack development. I eager to contribute to innovative projects and enhance my abilities in front end and back- end development. My goal is to become a proficient full-stack developer capable of delivering high-quality, efficient solutions.

PROFESSIONAL EXPERIENCE

Software Engineer Intern — SimpliFy Labs (LK)

Feb 2025 - Aug 2025

- Developed a **cross-platform Fitness App** using **React** and **React Native** delivering real-time workout tracking and progress monitoring.
- Integrated **RESTful APIs** to fetch exercise plans, user data, and activity history.
- Implemented **Redux state management** for consistent performance across mobile and web platforms.
- Designed responsive and **intuitive UI** components to ensure smooth navigation and user engagement.
- Optimized app performance by reducing API calls and leveraging memoization techniques.
- Collaborated with designers and backend developers in an Agile environment, ensuring timely feature delivery.

PROJECTS

Hardware Management System

- Developed a **full-stack** asset and hardware management system using **React**, **Node.js**, **Express**, and **MongoDB** for efficient hardware inventory and lifecycle management.
- Implemented secure **JWT authentication** and role-based access control for protected user access and API security.
- Integrated a **React Native** mobile application with the existing **REST APIs** to enable seamless mobile access and real-time system operations.
- Focused on **scalable architecture**, reusable components, and efficient backend API design to improve maintainability and performance.

AI-Based News Categorization Model

- Designed and developed a **machine learning model** using **Python**, **Pandas**, **Scikit-learn**, and **Keras** to automatically classify news articles into predefined categories.
- Handled **data preprocessing**, **text cleaning**, **feature engineering**, and **model training** to improve classification accuracy and prediction reliability.
- Used **Matplotlib** and **Plotly** for data visualization, performance analysis, and result interpretation during the model development lifecycle.
- Successfully trained and validated the model to generate accurate and consistent news category predictions.

Hospital Management System

- Contributed to **front-end development** using **Angular**, delivering a responsive and user-friendly interface seamlessly integrated with a secure, high-performance **Spring Boot backend**.
- Collaborated closely with the development team to ensure optimal user experience and consistent design.
- Prepared comprehensive project documentation detailing system features, user workflows, and technical architecture to support future enhancements and maintenance.

Library Management System

- Developed a **full-stack application** integrating an **Angular** frontend with a **Spring Boot** backend and a **MySQL** database.
- Implemented user authentication, search history tracking, and efficient API handling for smooth data flow.
- Designed a **component-based architecture** to enhance scalability, maintainability, and code reusability.

The Burger Joint POS System

- Developed a comprehensive **POS system** using **HTML**, **CSS**, and **JavaScript**, enabling efficient management of customer orders, billing, and order history. Designed an intuitive, responsive interface to streamline workflows, reduce processing time, and enhance the overall customer service experience.

Weather App

- Built a dynamic weather application using **HTML**, **CSS**, and **JavaScript** with **real-time API integration**, delivering accurate weather updates. Designed a clean, responsive UI to ensure an engaging user experience.

SKILLS	
Programming Languages Java, python, JavaScript, TypeScript, SQL	Databases MySQL , MongoDB
Frontend Technologies React, React Native, Angular, HTML, CSS, JavaFX	Tools & Platforms Git, GitHub, Postman, VS Code, IntelliJ IDEA
State Management Redux, Context API	Other Skills - API Integration (Custom REST APIs) - Responsive Web Design - Agile/Scrum collaboration tools (ClickUp, Jira)
Backend Technologies Spring Boot , Express	

EDUCATION	
Bachelor Of Information Technology SLIIT Uni - 2 nd year	2024 - Present
Institute of Computer Engineering Technology (iCET), Panadura Diploma: Computer Engineering Technology	2024
Advanced Level Passed in Maths Stream	2023
